

Bejárati ajtópanelek, díszüvegek

Bevezető

S-Line bejárati ajtóbetétek és díszüvegek

A különféle műanyag betétek ajtóinkat az otthon bejáratának meghatározójává teszik. Forma- és üvegviláguk megbízhatósággal, hosszú élettartammal, színtartóssággal párosul. Ezt mi sem bizonyítja jobban, minthogy az S-Line betétek minőségét az Építőipari Minőségellenőrzési Intézet is elismerte, ezért a termék megkapta az ÉMI minősítést. A több éves gyártási tapasztalat, a Nyugat-Európából érkező alap- és segédanyagok használata a legszigorúbb követelményeknek is megfelelnek. A biztonság fokozása érdekében acélmerevítéssel is rendelhetők.

Katalógusunk célja segíteni, hogy Ön is megtalálja a legmegfelelőbb ajtópanelt, legyen az tömör vagy üveges. A műanyag bejárati ajtók legmeghatározóbb eleme tehát az ajtóbetét és annak üvegezése. Az épület hangulatát, külső arculatát nagymértékben befolyásolja az üvegfelületek tagoltsága, díszítése. A betét színe is változtatható, alap kivitelben fehér, vagy többféle faerezetes színben választható. A díszüvegek segítségével színeket, fényeket és vidámságot csalogathat be lakásába. Az oldal- és felülvilágítókkal a beáramló fény mennyiségét tovább növelheti, és még világosabb, barátságosabb teret hozhat létre.
